

PROPERTY MANAGEMENT  
SNOW REMOVAL

Snow Management Services, LLC

SMS has been serving the Denver Metro for more than 20 years. “The SMS way” is protecting the well-being of our clients and their tenants and visitors at their commercial, industrial, retail, and medical facilities with true winter risk management service. SMS believes in education and has set itself ahead of the competition by pursuing and obtaining ISO certification July 28, 2014.

ISO 9001 is a set of International Standards for management and verification of good-quality management practices. ISO (International Organization for Standardization) is an international organization that certifies that businesses, government organizations and social entities meet certain common standards. SN 9001 is a newly created certification that works in conjunction with ISO 9001 specifically for professional snow and ice management contractors. A company earns certification through an independent, third-party audit.

The audit focuses on the company’s processes and ensure that their procedures adhere to Accredited Snow Contractors Association (ASCA) Written Snow Industry Standards. (ASCA), [www.ascaonline.org](http://www.ascaonline.org), is a snow industry trade organization that has lead the charge for legislative change in the snow and ice industry.

When asked why he chose to pursue certification, John Alexander, owner stated: *“The snow and ice management industry has often been looked down upon. We are not often given the respect we deserve for the risk management services that we provide our clients. SMS prides itself on staying abreast of all industry changes and doing everything we can to protect our clients from slip and fall claims. By becoming ISO SN 9001 certified we are better able to defend ourselves and our clients against spurious liability claims. We can now prove that we follow written industry standards.”*

SMS has built a sound reputation in providing professional and reliable, as well as competitive and cost-effective snow and ice management services. SMS’s core value is that “We accept responsibility for the complete satisfaction of our customers. We exercise this responsibility through adequate training of our employees, adherence to proven procedures and total commitment to meeting and exceeding customer requirements, and to maintaining an organizational culture that fosters continuous improvement.”
